

CITY SCHOOL DISTRICT OF ALBANY

Anthony R. Catalfamo, Supervisor of Buildings & Grounds

MEMORANDUM

TO: Parents, Guardians, Students and Staff

FROM: Anthony Catalfamo

RE: Neighbor Pesticide Notification

DATE:

The City School District of Albany practices Integrated Pest Management (IPM) for several years now. IPM is the process for managing, preventing and suppressing pests with minimal impact on human health and the environment. Pesticides are only used as a last resort. The District hires outside contractors for pest control. Contractors are required to follow IPM procedures. IPM is successful when teachers, students, maintenance and the contractor work together. We have been fortunate so far that pesticides have not been needed. However, it is possible that they may be needed in the near future.

Schools are required to maintain a list of parents, guardians, and staff who wish to receive advanced notice from the school of actual pesticide applications. If you wish to have your name posted on the list, please fill out the form below and mail to City School District of Albany, 270 Central Ave., Albany, N.Y. 12206, by . We are hopeful that with continued monitoring and IPM, we will keep pesticides away from our schools.

If you have any questions, please call me at 462-7323.

I wish to be notified in the event pesticides are to be used at _____. You can notify me at:
